by brushing.  
Drying Time @ 28.30 C & : Surface dry - 5-10 minutes  
60 \_+ 5%R.H. Recoating period - 3-4 hours.  
Finish : Smooth matt with slight sheen  
Packs available : 20 ltrs; 4 ltrs; 1 ltr.

**DIRECTIONS FOR USE :**

**Surface preparation:**

New plasters: It is advisable to allow new plastered surfaces to mature for a period of at least 6 months after the application of a recommended coat of lime-wash to ensure through drying of plasters. Popping of plaster commonly associated with new plasters can be taken care of subsequently during painting. Remove loose particles and paint flakes. Rub with sand paper to ensure that the surface is dry and free from dust, dirt, grease etc. In case of repainting jobs, previous coating, of lime wash, powder distemper etc. must be thoroughly scraped off. Earlier coating of oil-based or Synthetic Emulsion based paint need not be removed if in sound condition. However, the gloss or sheen of such coating must be removed by through sanding. Cracked or flaked paint must be removed completely. Fungus affected areas need separate adequate treatment. Repair the cracked portion of plasters and areas affected by leaks, drainage etc. well prior to painting. Allow the surface to dry sufficiently.
